Participating Resources (outside of direct project team)	n/a	n/a	n/a	

BI RELEASE: PROJECT PROPOSAL

Timeframe

July 2, 2023 – July 9, 2023

Key Deliverables

- Project proposal
Using the data sources from data.gov, my analysis will help answer the following questions: do individuals know they need help and are they receiving it? What age group is experiencing mental illness the most? Are there certain demographics that suffer more from mental illness? Can we predict possible problem demographics for mental illness symptoms?
- Draft of jupyter notebook file
Using pandas and jupyter notebooks, grouping and aggregation of data will need to be used, as well as visualizing categorical and statistical data. Also, training and modelling concepts will be used to predict future stats of mental illness for different demographics, age groups, etc.

Business Constituency

- Dr. Babb

Business Applications

- Jupyter Notebooks, Python, Pandas

Data Subjects

This will go over the rate of individuals receiving or not receiving care for their mental illness, what demographics are the most affected by mental illness.

Source Systems

- Mental Health Care in the Last 4 Weeks – Dataset from data.gov

- Indicators of Anxiety of Depression Based on Reported Frequency of Symptoms During Last 7 Days – Dataset from data.gov

Technology Required

- Computer
- Visual Studio code
- Python/pandas
- Jupyter Notebooks

Project Team (IT and Business)

- Sera Hill
 - Project lead/analyst

BI RELEASE: FINAL PROJECT

Timeframe

July 10, 2023 – July 26, 2023

Key Deliverables

- Jupyter Notebook File
This will include a dashboard for others to view the analysis and explore the datasets in question
- Written report summary
This will summarize the problem and answers found in the analysis
- Database
This will have the datasets from data.gov that are used for this analysis
- Future possibilities essay

Business Constituency

- Dr. Babb

Business Applications

- Jupyter Notebooks, Python, Pandas, VPS server, MySQL, PhpMyAdmin

Data Subjects

This will go over the rate of individuals receiving or not receiving care for their mental illness, what demographics are the most affected by mental illness.

Source Systems

- Mental Health Care in the Last 4 Weeks – Dataset from data.gov
- Indicators of Anxiety of Depression Based on Reported Frequency of Symptoms During Last 7 Days – Dataset from data.gov

Technology Required

- Computer
- Visual Studio code
- Python/pandas
- Jupyter Notebooks
- VPS Server
- PhpMyAdmin
- MySQL

Project Team (IT and Business)

- Sera Hill
 - Project lead/analyst

BI RELEASE: FINAL PROJECT & GRAD ENHANCEMENT

Timeframe

July 24, 2023 – July 30, 2023

Key Deliverables

- Jupyter Notebook File
This will include a dashboard for others to view the analysis and explore the datasets in question
- Written report summary
This will summarize the problem and answers found in the analysis
- Database
This will have the datasets from data.gov that are used for this analysis
- PhpMyAdmin credentials
- Backup of MySQL database
- Future possibilities essay

Business Constituency

- Dr. Babb

Business Applications

- Jupyter Notebooks, Python, Pandas, VPS server, MySQL, PhpMyAdmin

Data Subjects

This will go over the rate of individuals receiving or not receiving care for their mental illness, what demographics are the most affected by mental illness.

Source Systems

- Mental Health Care in the Last 4 Weeks – Dataset from data.gov

- Indicators of Anxiety of Depression Based on Reported Frequency of Symptoms During Last 7 Days – Dataset from data.gov

Technology Required

- Computer
- Visual Studio code
- Python/pandas
- Jupyter Notebooks
- VPS Server
- PhpMyAdmin
- MySQL

Project Team (IT and Business)

- Sera Hill
 - Project lead/analyst
